

RESIDENTIAL & COMMERCIAL WINDOWS & DOORS

# NEWSLETTER

SPRING 2021

Alex McLean (Director and Senior Estimator) and Fiona Kelly (Director and Sales Coordinator)

## WHO ARE WE?

Stag Aluminium has been trading successfully for 36 years, designing, manufacturing and installing aluminium windows, doors and curtain walling all across Scotland.

Our factory team in Kilmarnock manufacture Reynaers, Metal Technology, SAS Senior, Smarts and Exlabesa systems. Each product is carefully designed to be fit for purpose, maximising energy performance and of exceptional quality. We work directly and

on a sub-contracted basis with local authorities, schools, housing associations, contractors, health board, major housebuilders, one-off builders, developers and trade installers, on commercial projects, residential new builds and residential refurbishment.

## BEHIND THE SCENES

Stag Aluminium has an incredibly long serving team. Of the 19 employees working at Stag, 5 have over 30 year's service, 2 have over 20 years and 2 have over 15 year's service.

5 team members have been recruited in the last year to help the company cope with anticipated demand for the Reynaers system.

This commitment to the aluminium cause is a major factor in the success of Stag because the team are true aluminium experts. There is almost no project they have not successfully tackled, from Distilleries, to Prisons to Nuclear Plants, to Hotels and Private Dwellings.

# ALUMINIUM CURTAIN WALLING

Stag Aluminium's strategic focus is on the Scottish and Cumbrian markets and the company will always be a niche player, serving a tight network of premium customers who demand a high level of personal service that they know is backed up by outstanding technical competence in aluminium glazing systems.

Every day it seems, the Stag team receive quotation requests for 2-3 storey glazed screens that will accept a front door, for a substantial new build home. Stag can usually offer the perfect glazing solution in aluminium that will be structurally sound, watertight and slim, plus they can specify an aluminium residential entrance door, sourced from sister business, Spitfire Doors.
